RUSSIA UKRAINE CONFLICT

What Is Happening in Ukraine and Why Is Russia Invading...!!

Russia's invasion of Ukraine enters a new phase. After strong opposition to the Ukrainian military, Russian President Vladimir Putin's troops are determined to consolidate their positions in the south and east of the country as they begin a new offensive, bomb shelters and civilian targets.

Ukraine, meanwhile, has revealed what it says is a testament to the war in Bucha and other cities near Kyiv during the Russian occupation. Russia's attacks on human settlements have displaced four million people from Ukraine.

The US and its European allies supply military equipment to Ukraine and impose sanctions and other means of causing economic harm to the Russian leader. President Biden blamed Mr. Putin is accused of war and described the attack as "genocide," saying the Russian leader is "trying to eradicate the idea of being a Ukrainian." The Kremlin called his comments "unacceptable".

Although Mr. Putin acknowledged Russia's economic impact, he did not suggest that he would accept pressure to end the war. Negotiations between the two sides have failed to bring progress.

Latest on Ukraine's defense against Russia?

Russian troops are now trying to evacuate the eastern Ukraine region known as the Donbas after Ukrainian President Volodymyr Zelensky warned in April that there would be a new offensive. Russia has failed in its initial goal of immediately overthrowing Mr. Zelensky in Kyiv and is now trying to expand its territory to build a bridge to the Crimea, a peninsula occupied by Moscow in 2014. Russia's top military official said this would happen. has been extended to the Transnistria region of Moldova, where there are many Russian-speaking people. Mr. Zelensky also said that Russia would focus on other European countries.

Ukrainian officials have urged residents to leave the area east of the east, where the bombing has continued. A Russian missile strike on April 8 at a railway station in Kramatorsk killed at least 52 people. Ukrainian officials say a Russian plane crash in the Luhansk region on May 7 is believed to have killed at least 60 rural people who had taken refuge at the school. Both sides are focused on infrastructure to deter their rivals.

Kharkov, near the Russian border, has endured heavy casualties, and Russia is now successfully controlling the southeastern port of Mariupol, the site of the most difficult bombing.

Ukrainian troops were still trapped inside the city's main Azovstal iron plant, although many civilians are now out of custody under the protection of the United Nations and the Red Cross. The remaining Ukrainian troops vowed to fight to the end.

More than five million people have now left Ukraine, according to the United Nations refugee agency. Russia's Black Sea Fleet flag, Moskva, was hit by Ukrainian missiles and the Neptune cruise sank, according to Ukrainian troops and US officials.

Russia's defense ministry said it had drowned after the fire engulfed the ammunition store, without saying how the fire started. It was the largest naval ship ever under siege since 1945.

On the Russian side of the border, ammunition and other sites were attacked by what Moscow described as a fire, while several Russian military generals have been killed in Ukraine since the start of the attack.

How does the West support Zelensky in defending himself against Russia?

The US and its allies in the North Atlantic Treaty Organization are strengthening the eastern part of NATO, on the Ukrainian border Mr. Biden and other Western leaders have pledged billions of securities and humanitarian aid as concerns over Moscow's use of chemical, biological or other unusual weapons have grown.

Biden officials are also now going to significantly increase the intelligence given to Ukrainian troops so that they can target Moscow troops in Donbas and Crimea under Russian attack, which is part of a change in US support that includes \$ 800 million in other weapons.

The US, its NATO allies and other Western countries have strengthened their support for Ukraine by providing them with heavy weapons and training.

The Pentagon has released about 80% of the 90 US howitzers promised in Ukraine, and about 170 Ukrainians have been trained to use Howitzers, with many more to be trained soon, a senior US security official said in May. 2. said it would provide missiles and armored vehicles, among other programs.

US Secretary of Defense Lloyd Austin said on April 25 that he believed Ukraine could win if they had the necessary equipment and support. He was speaking after he and Secretary of State Antony Blinken traveled to Kyiv to meet with Mr. Zelensky, who said the US would restore the embassy to the country and increase military support.

Other dignitaries who have visited the country include the Speaker of the House Nancy Pelosi, the British Prime Minister Boris Johnson and the first American wife Jill Biden. .

The main weapon of the West is to cut Russia off the world financial markets and damage its economy. The US has also banned the importation of Russian oil, the Moscow economy, and Russia's natural gas and other energy sources.

The European Union plans to reduce its import of Russian natural gas by two-thirds by the end of this year and to prevent the import of coal into Russia.

**As On :-
25th April. 2022**

The EU has called for an end to Russia's crude oil purchases within six months, and a ban on imports of Russian crude oil products by the end of the year. Famous daughters of Mr. Putin are also sanctioned by the U.S., the EU and the U.K. Russian Foreign Minister Sergei Lavrov has said NATO has joined forces with Russia to help Ukraine and that it could escalate into a global conflict involving nuclear weapons. Russia has also suspended gas flows to Bulgaria and Poland, signaling a new growth in Western conflicts after refusing to pay in rubles. European Commission President Ursula von der Leyen has denounced the act as "fraud."

TERMINOLOGY ON DISRUPTIVE INNOVATIONS

Bitcoins

Bitcoin is a digital currency whose record is kept by Blockchain. A Blockchain is distributed database software which is a public ledger that records all bitcoin transactions. Since it is a digital currency the peer to peer transactions or chain needs to be verified by network which runs this software. Every time a transaction occurs, its information is shared across network to validate the transaction, which is done by miners and to avoid duplicate bitcoin transactions without a central agency, as in the case of real world currency.

Disruptive Innovation

A disruptive innovation is an innovation that creates a new market and value network which eventually disrupts an existing market and value network, displacing established market leaders".- Harvard Business School scholar Clayton M Christensen

Big Techs

Big Techs are Apple and Google, also retail giants such as Amazon and Tesco, are moving into the provision of financial services. Big Techs can use data garnered from clients, combined with their leading edge in the application of digital technology and artificial intelligence.

India's tax revenues exceed target by 20%, GST collection at all-time high.

Fintech and Digitech companies chasing overheated valuations may have lost the upper hand to incumbent banks, veteran banker KV Kamath said at the Times Network India Economic Conclave 2022

M-Pesa

one of the African countries made the world witness the biggest revolution till date in the form of 'M-Pesa', launched in 2007 by Vodafone and Safaricom, the largest mobile network operator in Kenya.

Prime Lending Rate (PLR)

It is the rate of interest at which a bank gives a loan to its most reliable customer that is a customer with "zero risks".
